

Identification and Classification in Food Images

Tom Barrett

September 23, 2017

Abstract

HI

Contents

1	Introduction	5
1.1	Summary	5
1.2	Objectives	5
1.3	Methodology	5
1.4	Overview of Report	5
1.5	Motivation	5
2	Background	6
2.1	Food Image Identification	7
2.1.1	What is Image Identification?	7
2.1.2	History of Food Image Identification	7
2.1.3	Proven Methods of Food Image Segmentation	7
2.2	Food Image Classification	7
2.2.1	What is Image Classification?	7
2.2.2	History of Food Image Classification	7
2.2.3	Proven Methods of Food Image Segmentation	7
2.3	Food Portain Size Measurement in Food Images	7
2.3.1	What is Portain Size Measurement?	7
2.3.2	History of Portain Size Measurement in Food Images	7

2.3.3	Proven Methods of Portain Size Measurement in Food Images	7
2.4	Tensorflow	7
3	Empirical Studies	8

Chapter 1

Introduction

1.1 Summary

1.2 Objectives

1.3 Methodology

1.4 Overview of Report

1.5 Motivation

Chapter 2

Background

2.1 Food Image Identification

2.1.1 What is Image Identification?

2.1.2 History of Food Image Identification

2.1.3 Proven Methods of Food Image Segmentation

Local Variation Framework

Graph cut

Colour

Texture

Convolutional Neural Networks

2.2 Food Image Classification

2.2.1 What is Image Classification?

2.2.2 History of Food Image Classification

2.2.3 Proven Methods of Food Image Segmentation

Support Vector Machine

Convolutional Neural Network

2.3 Food Portain Size Measurement in Food

Chapter 3

Empirical Studies

Bibliography
